# ANNOUNCEMENT

---

IN order to accommodate the ever increasing demand from state officials and departments for satisfactory rubber stamps and rubber goods at an economical price, the State Printing Department has installed a complete up-to-date complement of rubber stamp machinery and supplies, and is in position to supply these demands at a marked saving in prices over commercial establishments in this line of trade.

In this catalog will be found illustrations, descriptions and prices of only the most used articles in this line. However, this department is in position to supply practically anything made in rubber, and correspondence is invited.

State departments will have the advantage of procuring rubber goods through the State Printing Department at actual cost, and it is hoped and expected that advantage will be taken of this opportunity.

Prompt and careful attention will be given all orders.

Stamps and supplies handled by this department may be procured through the regular printing requisitions, which are in the possession of all state departments.

---

## PRICES

---

Goods in this catalog are listed at approximate market prices, but charges will be made at actual cost, ranging from 10 to 50 per cent less than list.
